

# Prepping For Your Move

## 360 Degree Moving

Your Expert Movers From Start to Finish!

### Valuables and Documents

360 Degree Moving has an internal policy about transporting customers' valuables. It is required that customers keep and move any valuables and important documents on their own. Valuables can include, but aren't limited to:

- Jewelry
- Heirlooms
- Collections (coins, stamps, etc.)
- Cash
- Important documents and photos (deeds, wills, ID's, SS cards, etc.)

### Perishable Items

Food, animals and live plants are perishable; they can easily spoil, die or suffer damages if not properly packed. These are items we will not move.

### Hazardous Items

All items that are considered flammable, hazardous, corrosive or explosive are dangerous and illegal to move.

### Label Everything

Label all boxes with its contents and the room on the top and side of the moving box. This way you and the movers are able to read the labels once you stack them on top of each other and know exactly where to unload your belongings once we reach your new home.

### Conduct a Pre and Post Walk Through

Conduct a pre-walk through and make sure the items you are taking matches the binding price inventory list. If you decided to take additional items last minute, discuss this and any additional charges with our mover prior to the move. For the post- walk through take one last sweep of the house to make sure nothing was left behind before the driver leaves.

### New Home Walk Through

At your new home you will need to take the movers around your house, identifying 'which room is which' for the unloading of your belongings.
